DETAILED ACTION

Specification

Claims 1-9 objected to because of the following informalities: The numbering of the claims on the side of the page is improper. Those numbers look like line numbers. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3,5-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Duboust et al.-2005/0221723.

Duboust discloses a multilayered polishing pad (18) with a polishing layer (22) and a base layer (20). The base layer can be 30Mils thick which is the range of 500-2500 micrometers [0008]. The base layer has Shore hardness of 20 [0048] and is made of closed cell polyurethane [0048]. The polishing layer can be 5-10 Mils thick, the base layer is 4.5-8 times that thickness which the total thickness would be within the claimed range of 2000-4000 micrometers. The base layer has compressibility of 3% [0049].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duboust in view of Roy et al.-2006/0276109.

Duboust discloses the pad as detailed above but not the way in which it was made. Although claims 4 and 9 method of making, do not further limit the base pad of independent claims, Roy teaches making a polishing pad by a first reaction producing a prepolymer and then reacting that with a polyol in a second step [0104]. Therefore, it would have been obvious to one of ordinary skill in the art at time invention was made to produce the pad of Duboust with the method of Roy in order to produce a pad of a highly consistent material.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eileen P. Morgan whose telephone number is 571.272.4488. The examiner can normally be reached on Monday-Thursday, 7am-3:30pm EST.
